

Earmuffs of Recycled Material

Written By: Team Recycling Et Cetera

TOOLS:

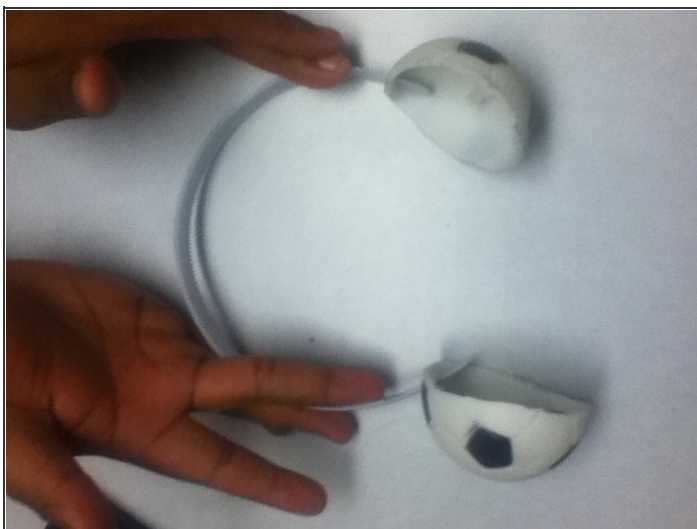

- [Fabric/craft glue \(1\)](#)
- [Rubber band \(1\)](#)
- [Sewing kit \(1\)](#)
[optional](#)
- [Sharp knife \(1\)](#)

PARTS:

- [Small, sports-themed hollow ball \(1\)](#)
- [Headband \(1\)](#)
- [Cotton stuffing \(1\)](#)
- [Fabric \(1\)](#)
- [Small headphone speakers \(1\)](#)
[optional](#)

Step 1 — Earmuffs of Recycled Material

- Cut sports-themed ball in half with the sharp knife. Cut small slits on top of each half big enough for the headband to slide through and fit snugly.
- Secure headband by wrapping a rubber band on each side of the headband within each half of the ball to ensure that the headband does not slide out.
- Add the stuffing to the inside of each half of the ball.

Step 2

- Wrap the fabric around the opening of each half of the ball. Secure it to the ball's inside edge with fabric glue and let it dry.

Step 3

- Your warm, sporty earmuffs are ready to wear!
- Optional: Headphone earmuffs
 - Sew a small pocket into the fabric before securing it on the half of the ball.
 - Place the headphone speakers into the pocket and sew around them to hold them in position.
 - Glue the fabric as in Step 4 with the headphone cords downward.

These custom earmuffs are simple to make and comfortable to wear.
